## SGL expands its APAC intermodal service offerings facing the upcoming peak season

24 Sep, 2018 | [Share](#)

Facing the challenges around the yearly peak season, Scan Global Logistics offers an expanded intermodal service from APAC to Europe.

Events such as Christmas, Black Friday and Halloween put extra pressure on the import/export schedules and often causes congestions and delays at the airports as well as an increase in prices!

In order for you to get around this, we highly recommend our sea-air transport set-up, which we offer from a wide range of origins in China and South-East Asia. Through our strategically well-placed hubs in Asia and the Middle East, we are able to offer transit times of 10-20 days for door-to-door delivery.

The sea-air combination provides you with a value-for-money service with fixed monthly schedules and the possibility to have locked rates for up to 3 months. Reduce your carbon footprint, save costs compared to airfreight and save time compared to ocean freight!
