OUR CULTURAL DNA

TURNING A BOLD BELIEF INTO A PROVEN BUSINESS MODEL

OUR PURPOSE

We exist to make the world a little less complicated

Living in an increasingly interconnected world opens unseen possibilities of moving anything anywhere. But while opportunities are rapidly multiplying, the challenge of finding the right way grows ever more complicated.

Through combining know-how and entrepreneurship, we strive to make the world a little less complicated.

OUR MISSION

We believe that our purpose can best be fulfilled by bringing a human approach to everyone everywhere

By applying a 'can-do-attitude' and staying open to possibilities and our fellow beings, we allow ourselves to level up – as individuals, as an organisation, and as part of society at large.

It makes bringing anything anywhere – whether by air, ocean, rail, or road – purposefully far beyond the final destination.

OUR VIRTUES

-  **Respect**
-  **Entrepreneurship**
-  **Integrity**
-  **Fun**

Four fundamental virtues guide our actions and approach to others, be it customers, suppliers, or each other.

Strongly dedicated to creating the most meaningful workplace within the logistics industry, our virtues lie at the core of who we aspire to be and how we strive to do business while fulfilling our purpose and mission.

**SCAN GLOBAL
LOGISTICS**

OUR CULTURAL DNA

FOUR VIRTUES AT THE BASE OF CREATING A MEANINGFUL WORKPLACE

RESPECT

We don't believe in entitlement, but that **all human beings are equal in worth** no matter who they are or what they do

We don't believe in being flawless, but in **the ability to combine perseverance with innovation** to get things done and learn from our mistakes

INTEGRITY

We don't only believe in good intentions, but in **honesty and execution** to have the least possible distance between what we say and what we do

FUN

We don't merely believe in protocols, but in **fostering an informal atmosphere powered by positive energy** for human relationships to prosper

A PEOPLE'S BUSINESS

PEOPLE-CENTRICITY AT THE HEART OF OUR STRATEGY

APPENDIX SLIDES

HIGHLIGHTS 2023 – SGLT HOLDING

PERFORMANCE HIGHLIGHTS

EBITDA before special items margin (%)

SOLID EBITDA*

In 2023, SGL Group leveraged on its diverse business model and accomplished an EBITDA* of EUR 193m compared to the all-time high of EUR 211m in 2022.

*Before special items

OPERATING CASH FLOW

The operating cash flow amounted to positive EUR 28m in 2023 despite the challenging environment, following the record year 2022. The operating cash flow in 2023 was negatively impacted by the acquisition of the SGL Group, the development in net working capital and effect of increased financing of bonds.

**Excluding costs related to the acquisition of Scan Global Logistics by CVC Funds, the operating cash flow would amount to EUR 50m for the full year 2023

STEADY VOLUMES

Despite the challenging macro- and geopolitical environment, SGL Group was able to maintain ocean freight volumes on par with 2022 through solid ocean performance. Air freight volume experienced solid growth compared to 2020/2021 and only declined 12% compared to 2022 as there was a significant shift from ocean volumes to air freight volumes due to high ocean freight rates.

The development in TEU (Twenty-foot Equivalent Unit) and Tonnes shown below are all reflected in thousands.

STRATEGIC HIGHLIGHTS

A- RATING

Maintained the A- score in our second year of disclosing to CDP (Carbon Disclosure Project), confirming our position in the 'Leadership' category, which recognises companies for implementing best practices on climate action.

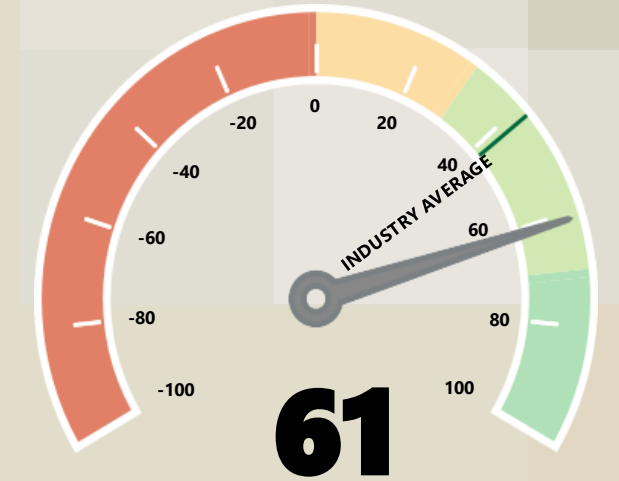

+50 COUNTRIES

SGL continues to progress well on its diverse pipeline of acquisition opportunities and materialised six acquisitions in 2023 (one with closing in 2024), establishing platforms in Switzerland and Portugal, and further strengthening the platforms in Denmark, Germany and the USA. Greenfield activities include geographic expansion to Kenya and Romania. With the combination of acquisitions made and greenfield activities, SGL is now operating in more than 50 countries.

NET PROMOTER SCORE

SGL achieved a best-in-class NPS score of 61 in 2023 compared to both mid-marked peers and largest freight forwarders. This is an improvement from the score of 53 in 2022.

B RATING

S&P has affirmed 'B' rating and **revised outlook to Positive**. Fitch has affirmed 'B' rating with Stable outlook and rated the Bonds 'B+'.

CVC

NEW MAJORITY SHAREHOLDER

In 2023, SGL was able to announce CVC as the new majority shareholder. CVC supports our ambitious growth strategy and we see CVC as the perfect match for SGL professionally and culturally.

NEW CHAIRMAN

In 2023, SGL was pleased to announce the appointment of Nils Smedegaard Andersen as the new Chairman of the Board.

We see Nils Smedegaard Andersen's impressive and deep industry knowledge and capabilities as a great fit helping us to fulfill SGL's ambitious strategy.
