New possibilities from China

22 Jun, 2015 | [Share](#) [↔](#)

Scan Global Logistics now offers Rail service between China and Europe

With our railway solution, we offer transport from all major business centers across China to our hubs in Hamburg and Warsaw. From our hubs, the cargo is distributed to our clients across the Nordics. We offer a fixed time schedule for both LCL and FCL with 2-3 weekly departures.

A stable and flexible rail service that brings your cargo door-to-door safely from China to the Nordics.

“With our rail solution, we give our clients a reliable alternative to expensive air and slow sea freight from Greater China. The solution adds additional flexibility to our clients’ supply chain as the mode of transport can easily be changed from air and sea to rail, if needed. The rail solution is internationally recognized and will be developing rapidly over the coming years” - Kim Linde, Business Developer at Scan Global Logistics.
