

# Did you know that Romania played an essential role in modern aviation\*?

Engine engineering goes far back, but it was the Romanian aviation pioneer, Henri Coandă, who invented the first modern jet engine with enough power for practical use in aviation. Today, you will find the same joy of creative thinking, persistence and applying new perspectives to find effective solutions inherent in our Romanian logistics team. Though specialists in moving your air cargo fast and timely, best-in-class LCL and FCL ocean freight services are also available to and from our neighbouring Eastern European countries.

Bordering the Black Sea, Romania is the gateway to Central Europe and Central Asia. Working closely with colleagues in Hungary and the Czech Republic, our close-knit team of experts, sharing years of industry experience, are ready to move your goods inland, inter-regional or into any part of the world. And don't worry about complicated customs. As part of our comprehensive and tailor-made end-to-end logistics solutions, you can rely on our in-house air and ocean customs clearance experts to uncomplicate your cargo flow.

Modern aviation made the world seem smaller. From Constanta Port in the East via Bucharest to Budapest and Koper in the West, our global network provides you access to any final destination you want by air, ocean, rail -or road.

We are ready to take your business to new heights whenever you are.
