

**Did you know that
in Finland, saunas
outnumber cars?**

In Finland, with a population of 5.5M, there are three million saunas. That's more saunas than cars, and clearly, a testament to the Finns' love for relaxing and unwinding in the sauna. Our local logistics team takes the same care to address your supply chain needs so that you can enjoy your time worry-free.

Your peace of mind begins with your single, dedicated point of contact, who will do whatever it takes to provide you with flexible and tailor-made solutions, from transporting urgent spare parts to managing heavy lift shipments.

Let us know your requirements, and our local experts will provide you with cost-efficient, tailor-made and optimised solutions. You will find our services available in all major airports, container, ro-ro and breakbulk ports in the country, ensuring your competitiveness whether you need ocean, airfreight, or any other mode of transport.

Cross-bookings worldwide

Is your HQ or procurement in Finland, but your main markets elsewhere?

With our cross-booking services, your shipments are processed smoothly in all time zones via our extensive global network. We guarantee full visibility, fast response time and access to our logistics team at origin and destination, including door-to-door shipments and customs brokerage services.

Coming from a culture of enjoying ourselves, we are ready to ease your worries and mind, just like a visit to the sauna can.
