

**PHILIPPINES**

**Did you know that Filipinos text more than anyone else in the world?**

**400 million texts daily, or 142 billion a year, is the staggering amount of texts sent within and from the Philippines. That is more than the US and the UK combined!**

Although English is our official business language, more than 175 languages are spoken across the 7,640 islands of the Philippines archipelago. Don't worry! Our local team understand the local languages and is speedy in all communication methods, similar to how we manage your cargo where skills and efficiency matter.

Our local culture and region expertise for Air, Ocean, Rail and Road will ensure your cargo are secure from dispatch to delivery.

A long list of Fortune 500 to 1,000 customers see us as their preferred logistics suppliers, and we happily welcome you too.
