## Scan Global Logistics' own LCL rail consolidation schedule is now available online

05 Jul, 2019 | [Share](#) ↗

Scan Global Logistics has transported goods via rail in our own LCL rail consolidation product from China to Denmark for years and we have now made our weekly rail transportation schedule available on our website.

It is a way for your business to catch up with unexpected delays in your Supply Chain without expensive airfreight solutions: to reach campaign or production deadlines more cost efficiently.

The transit time from departure to delivery door in Denmark is just 20 days! You may visit our weekly transportation schedule for Denmark [here](#).

Additionally, Scan Global Logistics offers FCL rail solutions from anywhere in China to Denmark with rail transit times from rail yard to rail yard of only 14-16 days.

Rail transportation is an evident choice to reduce CO2 emissions during transportation and leave a greener ecological footprint in an increasingly environmental-oriented world.

Scan Global Logistics makes your rail transportation a little less complicated.
