

DENMARK

Did you know that the game of handball originates in Denmark?

The first written set of handball rules was published in 1906 by the Danish gym teacher and Olympic medalist Holger Nielsen. Since then, the team sport has become one of Europe's most popular sports. You will encounter the same team spirit with our logistics experts. Whether you need an air, ocean, rail, or road solution, they enjoy finding exactly the right openings and solutions on the logistics playing field to help you be your best.

In fact, regardless if you need comprehensive logistics solutions within pharma healthcare, aid and relief, or you specialise in fashion, automotives, energy or heavy industrial projects, our skilled experts know the solution.

As a maritime nation, several industrial ports link Denmark to the Nordic, Baltic, European and US trade lanes. Roads and rails crisscross the island country interlinked with bridges, the longest connecting Denmark to Sweden.

The main airports of Billund and Copenhagen serve West and Eastern Denmark, with the latter as the predominant hub for the Nordics. So regardless of your destination, trust that our skilled colleagues know the best routes and modes of transport for your import and exports.

Like a handball match is only won through teamwork, flexibility and an agile approach to ever-changing circumstances, we know the game of logistics. We are ready to win it with you.
